

Stahl Sheaffer Engineering Once Again Ranked as a Top 500 National Design Firm by Engineering News Record

Stahl Sheaffer Engineering has once again made the list of Engineering News Record's (ENR) National [Top 500 Design Firms list](#). Published annually, this list ranks the 500 largest US engineering and architecture firms based on design-specific revenue.

Founded in 2006, the firm continues to grow, with 170 people in multiple disciplines across three states. Stahl Sheaffer balances resources and projects across diverse regions and markets. Higher education, public transportation, municipal, private development, and energy markets continue to figure prominently in Stahl Sheaffer's success.

Principals Rod Stahl, Jeff Sheaffer, and Aaron Fayish express their "sincere thanks and appreciation to our clients for the trust they have placed in our firm and staff, which has enabled us to reach this milestone for the second year in a row."

Core disciplines of civil and structural engineering include building, bridge, roadway, and site design as well as survey and construction inspection. Investments in technology and expertise include survey-grade mobile LiDAR scanning, aerial mapping, geotechnical services, asset management, GIS solutions, and the qualified staff to ensure project success.
