Project

Penn State Lacrosse Facility, University Park, PA

Stahl Sheaffer completed the schematic design phase for the proposed upgrades to the Lacrosse Facility including pressbox, seating, and other stadium amenities. Stahl Sheaffer is currently under contract to complete the site and structural design aspects for the complex, which include retaining walls to form terraced seating, a state of the art building that will house television and radio broadcast spaces, concessions, restrooms and an elevated VIP seating/terrace area. Building features include two way cantilevers, long-span deck, a living "green" roof, and structural elements designed as architectural features.
